PERSONAL PROFILE

Front-end focused Software Developer with experience building modern, responsive web interfaces using React, Tailwind, and .NET in Agile, product-driven environments. I have delivered scalable UI solutions for high-traffic platforms, translating designs into accessible, production-ready components, while working closely with cross-functional teams. Strong foundation in clean architecture, CI/CD pipelines, and working with structured datasets. Motivated by building intuitive interfaces that unlock measurable user value.

TECHNICAL SKILLS

- **Frontend:** React, JavaScript, Tailwind CSS, HTML, CSS, SASS/SCSS
- **Backend:** .NET, PHP, CodeIgniter, Umbraco
- **Tools:** Azure DevOps, Git, VS Code, Figma, WordPress
- **Methods:** Responsive UI, Component-driven development, Accessibility, CI/CD, Agile delivery

EXPERIENCE

Mediaworks – Web Developer, Mar 2025 – Present

- Built and maintained .NET/Umbraco sites used by thousands of monthly users, ensuring scalability, accessibility, and responsive UI using Tailwind.
- Delivered front-end and back-end development for the Citizen Housing and West Yorkshire Combined Authority websites, attracting thousands of monthly visitors and exceeding client expectations.
- Contributed to the creation of Azure DevOps pipelines, enabling streamlined and reliable code deployments.

Lynchpin Media - Web Designer, May 2024 – Feb 2025

- Designed and created new company newsletter templates emailed to thousands of readers.
- Collaborated with cross-functional teams (marketing, content creation) to ensure website designs aligned with company branding and marketing goals.
- Successfully increased newsletter engagement rates by 5% through template redesigns.

Lazy Grace - Web Development Internship / Freelance Work, Jul 2022 – Sep 2022 / Sep 2023 – Jan 2024

- Coquet Books Site: Full-stack development of this website, providing a fully functioning e-commerce site.
- Modernising legacy PHP sites by integrating CodeIgniter and updated front-end libraries.
- Created a custom form builder app for a boiler company using PHP, improving client workflows.

Drummond Central - Apprentice / Junior Web Developer, Sep 2018 – Sep 2020

- Integrated sites into CMS (Umbraco, WordPress), maintaining and updating content.
- Visit Northumberland Site: Front-end development for a large-scale tourism site (HTML, CSS, JS).
- Alnwick Town FC website: Built a full-stack blog website for a local football team, managing both design and development, which used Umbraco CMS.

EDUCATION

Newcastle University - BSc Computer Science (First-Class Honours), Sep 2020 - Jul 2023

- **Dissertation:** Python-based analysis of UK railway data variability using data visualisation and statistical methods.
- Built a full-stack carbon-footprint platform with authentication, used in a team project following Agile practices.
